

ThanoSeal™

Eliminate Leaks • Seals Skin Slip • Seals Incisions

Usage

ThanoSeal™ tape is a clear occlusive film sealant designed to seal incisions, lacerations, abrasions, punctures and leaking wounds. Do not use on living tissue.

Features and Benefits

- ThanoSeal™ is specifically designed for the funeral/embalming profession
- Intended for use on incisions, lacerations, abrasions, punctures and skin slip
- Provides a complete seal to dry tissue which will eliminate leaks
- Can replace traditional liquid sealants, no more waiting for glue to dry
- Highly aggressive, non-sterile adhesive ensures no slips
- Once applied, exterior can get wet without compromising seal
- Easy to apply, no additional frame to remove like other products
- Saves time, avoids "issues", saves money

Directions

1. Clean and dry the area around the incision or wound. Please note: Moisture and debris on the tissue may result in an incomplete seal.
2. Select the ThanoSeal™ tape size suitable to cover the incision or wound and the surrounding area.
3. With forceps, pull up one corner of the tape to remove it from the release liner.
4. Apply firm and even pressure to ThanoSeal™ tape to complete the seal and maximize the adhesive bond.

Recommendations

- A cotton based product is most effective for cleaning application area
- To avoid waste, minimize unintended contact of ThanoSeal™ tape with tissue, gloves or other objects

ThanoSeal™ is available in 2"x2" and 4"x4" Squares, 3.75"x2" Ovals, and 4"x25" Roll

ThanoSeal™ 3.75" x 2" Oval
